red mite**

**Clifton
COOPS**

The search is over:

Clifton Coops are the answer to hen keepers' needs for hygienic, durable and attractive henhouses - *without breaking the bank.*

If a hen could choose . . .

The Winscombe:

3-6 hens. Available with or without run

The Churchill:

6-10 hens. Available with or without run

We reserve the right to make specification changes without notice.

For more information visit www.brinsea.com/cliftoncoops or call 1-888-667-7009 to find your nearest supplier.

Clifton Coops are computer designed and precision manufactured housing systems to provide the ideal environment for your hens.

Each coop is supplied in flat pack form and assembly is simple thanks to our unique Coop-Clip assembly system. The non-porous materials and ease of cleaning mean it's easy to keep red mite at bay.

Each model is based on classic hen house design with the option of a tough, long-lasting welded mesh steel run. Access for egg collection is via a convenient door on the back and a full clean-out is made easy with removable roof panels and droppings tray.

The two houses are elevated off the ground which the birds prefer and which makes access to the house for cleaning and egg collection easier.

Dimensions	House internal floor area (including nest tubs)	Run floor area
Winscombe	35"x19" : 87x47 cm	40"x69" : 100x172 cm
Churchill	35"x38" : 87x94 cm	40"x90" : 100x225 cm

Clifton Coops are:

- Tough and durable.** The designs need no maintenance, are resistant to the effects of UV light, are highly resistant to predators and easy to move.
- Precision designed and manufactured** from 100% UK recycled plastic for minimum carbon footprint.
- Comfortable for your hens** with ample space, plenty of ventilation and moulded nest areas and elevated wooden perches as standard.
- Helps eradicate red mite.** The materials and designs are chosen to minimise the crevices where mites hide and make cleaning them away as easy as possible.
- Available with **free 3 year guarantee**, subject to simple on-line registration.

For Happy Hens . . .
