

NEW

The Maxi 48 Advance and Maxi 48 EX incubators

The **Maxi 48 Advance** offers high-capacity egg incubation with fully automatic egg turning and precise digital temperature control. It includes alarms for power failure, temperature fluctuations, and Brinsea's patented room temperature alarm for added peace of mind. A periodic cooling option further enhances hatching success. For even greater convenience, the **Maxi 48 EX** adds fully automatic and highly accurate humidity control, ensuring optimal conditions throughout incubation.

The **mix-and-match egg quadrant system** makes the Maxi 48 incubators ideal for those incubating eggs of different sizes. Four quadrant types are available for **quail, hen, duck, and goose eggs**. These quadrants simply clip together and can be mixed and matched as needed. The **Maxi 48 Advance** comes with **hen and duck quadrants** as standard, while the **Maxi 48 EX** includes all four: **quail, hen, duck, and goose**. This system provides maximum versatility and ease of use for users needing **large capacity and multi-size egg compatibility**.

FEATURES

ADV **EX**

| | | |
|---|---|---|

With the easy-to-use Connect app, you can track every stage of incubation with features such as a countdown to hatch, programmable egg turning intervals, and optional periodic cooling. The app also provides instant alerts for both incubator and room temperature changes and notifies you immediately in the event of a power outage – giving you the chance to act quickly and protect your hatch. Full smartphone control of key settings, including humidity, temperature display, and automatic turning, brings unmatched convenience, flexibility, and confidence in every hatch.

EGG HANDLING

Maximum Egg Capacities
(approximate) using egg quadrants as supplied

| | |
|----------|----|
| Quail | 68 |
| Pheasant | 48 |
| Hen | 48 |
| Duck | 24 |
| Goose | 16 |

Eggs of one species can widely vary. Capacity will depend on their size and shape.
