

Ovation 28 Zoologica and Ovation 56 Zoologica exotic egg incubators

Parrot and other exotic bird breeders demand an incubator capable of handling delicate eggs that may need very frequent turning along with extremely precise control of humidity and ventilation.

Although Brinsea's Mini and Maxi II EX models meet these stringent requirements and are very popular, parrot breeders have asked us for a larger incubator fulfilling the same criteria but for a greater number of eggs.

The new **Ovation 28 and 56 Zoologica** models are based on the highly successful Ovation 28 and 56 EX (which remain available) but replace the poultry egg troughs with a flexible and zero-impact roller turning system along with an insulated base to further improve thermal control. These new models feature the same precise digital control of temperature, humidity and the Induced Dual Airflow of the EX models but now have finer control of turning interval and angle. The end result are incubators of unparalleled performance and the ability to turn the most delicate of eggs with precision and control.

The spacing between the Ovation Zoologica's turning rollers (right) can be adjusted to accommodate a wide range of egg sizes from finch to goose (max. 65mm diameter).

Approximate egg capacities are:

Zoologica	28	56
Finch	40	80
Cockatiel, Lovebird	30	60
African Grey, Eclectus, Amazon, Cockatoo, & small Macaws	20	40

Combining, tough construction with high performance and egg capacity, the Ovation incubators are ideal for the serious breeder.

Brinsea's Induced Dual Airflow system represents a breakthrough in incubator design and achieves new levels of temperature consistency for optimum incubation conditions.

Adjustable turning rollers
